

### 3 Sided Impact Frame

Impact Frame is available in Bronze/Brown or Soft White. The Impact frames are designed to stay in place, and you can install or remove the Polycarbonate at any time. We can make these frames without the bottom frame piece, so that after removing the Polycarbonate, you will not have the bottom frame piece to trap leaves or other debris in your outside window cavity. The bottom end of the Polycarbonate will rest upon the sill.

With bottom frame piece
