TRIM Mount measuring and mounting for: OUTER1.25 and Impact Frame

We have the only Storm Window on the market where all 4 sides of the frame flip up to easily remove your storm acrylic for cleaning or seasonal removal. It's super fast and easy. Holds acrylic in tightly, no rattling, tight seal. As the illustrations show, you need the sidewall clearance to allow the 4 frame sides to flip up and back.

Below: You must have a minimum 1.50" trim width for frame tops to flip up and back.
